

McMULLEN & WING CELEBRATES INDUSTRY RECOGNITION

as **ERMIS²** is voted "Best Power Yacht, 24-40 metres" at the 2008 International Superyacht Society Design and Leadership Awards in Ft Lauderdale, Florida.

McMullen & Wing of Auckland, New Zealand are delighted to receive another international award for the ultra-high speed motor yacht **ERMIS²**. Launched at the end of 2007, **ERMIS²** is a 124ft infused carbon-fibre composite super yacht that can travel at speeds in excess of 55knots.

The awards ceremony held during the Ft Lauderdale International Boat Show honours the best-of-the-best, recognizing the top builders, designers and a distinguished leader in the yachting industry. Awards are highly valued as they reflect not only decisions by a judging panel but also peer recognition through voting involvement.

Following successes earlier this year at both the World Yacht Awards and ShowBoats Awards, both in the Innovation category, **ERMIS²** edged out some very tough competition in one of the most highly contested award categories.

"Winning overall 'Best Power' in her size range is a wonderful achievement and we take this opportunity to congratulate and thank our staff and suppliers".
